

# RESULTS SNAPSHOTS :

The screenshot shows the Jenkins Pipeline Overview for Build #4. The pipeline consists of seven stages: Start, Clone Repository, Terraform Init, Terraform Plan, Terraform Apply, Post Actions, and End. All stages are marked with green checkmarks, indicating successful completion. The 'Details' panel on the right provides additional information: the build was manually run by Suchitra R, started 2 minutes and 29 seconds ago, was queued for 4 milliseconds, and took a total of 2 minutes and 3 seconds to complete. Navigation buttons for 'Rebuild', 'Console', and 'Configure' are visible at the top right.

Start Clone Repository Terraform Init Terraform Plan Terraform Apply Post Actions End

Details

- Manually run by Suchitra R
- Started 2 min 29 sec ago
- Queued 4 ms
- Took 2 min 3 sec

Jenkins 2.486

The screenshot displays the Jenkins Console Output for Build #4. The left sidebar contains a list of navigation options, with 'Console Output' selected. The main area shows the build's execution log, which begins with the user 'Suchitra R' starting the pipeline. The log includes standard Jenkins pipeline markers like '[Pipeline] Start of Pipeline' and '[Pipeline] node'. It also shows the execution of 'git init' and 'git fetch' commands on the remote repository 'https://github.com/Suchitra2308-su/terraform\_ass.git'. Several warnings are present, indicating unknown parameters for AWS credentials and a missing GitHub credential. The log concludes with the command 'git --version', which returns 'git version 2.25.1'.
